

Wattkiss Automation Ltd.

WEEE Compliance Statement

WEEE Directive (2002/96/EC)

The Waste Electrical and Electronic Equipment Directive (WEEE) applies to companies that manufacture, sell, and distribute electrical and electronic equipment in the E.U. It covers a wide range of large and small household appliances, IT equipment, radio and audio equipment, electrical tools, telecommunications equipment, electrical toys, etc.

The Directive aims to reduce the waste arising from electrical and electronic equipment, and improve the environmental performance of everything involved in the life cycle of electrical and electronic equipment. This is translated into the following requirements:

- Producers (manufacturers or importers) of electrical and electronic equipment will be required to register in their countries.
- Private households will be able to return their WEEE to collection facilities free of charge and producers will be responsible for financing these facilities.
- Producers will be required to achieve a series of demanding recycling and recovery targets.
- Producers will be required to mark their products with the 'crossed out wheeled bin'. This symbol indicates that the equipment carrying this mark must NOT be thrown into general waste but should be collected separately and properly recycled under local regulations.

Wattkiss Automation Ltd. is dedicated to minimizing the impact our products have on the environment and to comply with the WEEE Directive.

All applicable products are marked with the WEEE wheeled bin symbol. We are registered with an approved producer compliance scheme (Producer Number WEE/JJ0046SY, Valpack Z056692).
