

# Watkiss PowerSquare™ Book Stacker

By running unattended for extended periods, the PowerSquare Book Stacker delivers huge efficiency gains.

PowerSquare Book Stacker

The PowerSquare Book Stacker delivers huge efficiency gains by allowing the Watkiss PowerSquare Booklet Maker to run, unattended, for extended periods.

This new accessory stacks finished books vertically which is extremely space efficient; and it requires very little additional floorspace. With a capacity of 930mm, it can run for up to an hour without operator intervention. The stacker accommodates different sized books without adjustment and can be unloaded on-the-run to give uninterrupted production.

The PBS connects to both online and offline Watkiss PowerSquare Booklet Makers. The PowerSquare connects to most high volume sheet fed printers, and its capability for books up to 50 sheets (200 pages) thick means that it handles an exceptionally high throughput. The new PBS Book Stacker makes this type of work much more efficient for high volume users.

Stack different sized books without adjustment

## Specifications

|                   |   |
|-------------------|---|
| <b>Production</b> | Operates at the same speed as the Watkiss PowerSquare, no productivity loss   |
