

WATKISS BOOKLET MAKING

CREATIVITY · ACCURACY · EFFICIENCY

Watkiss Booklet Makers

With two distinct ranges of bookletmaking equipment to choose from, you can select the ideal solution appropriate to the quantity, run length and production rate you need.

Automatic Stitch-Fold and Trim

The Automatic Stitch-Fold and Trim units are the professional choice for high production stitching, folding and trimming online to Watkiss collators. They provide high volume users with consistent accuracy and reliability.

Fully automated, all the settings for sheet size, fold and stitch position, book thickness and trim margin are set to within 0.1mm from the DigiVAC+ or Vario's colour touch-screen. Pre-defined settings for standard sheet sizes make setup fast, precise and easy. Additional memories store custom jobs settings for future use.

The patented clamshell design makes the Automatic Stitch-Fold remarkably compact. It also provides the collated set with a near vertical infeed paper path, resulting in well aligned sheets and accurate books every time. Side-fed stitching heads demand less maintenance and provide excellent reliability.

For a perfect finish, especially on thicker books, the optional online trimmer clamps the spine and trims the fore-edge with a high speed steel blade which has a self sharpening scissor action.

BookMaster and TrimMasters

The BookMaster range of booklet makers and trimmers combine maximum performance with cost effectiveness. They are simple to operate and low maintenance, making them by far the most advanced, user friendly and reliable staple-fold booklet makers available today. They can be used off-line for hand feeding, or on-line to Vario and DigiVAC collators, as well as other manufacturer's bench-top collators. The BookMaster has a unique low impact stapling mechanism that ensures virtually maintenance free operation. The main wearing parts are included in the staple cartridge and are replaced every 5,000 cycles when the cartridge is changed. As a result, over one million cycles can be run before staple head maintenance is required. The optional TrimMaster trimmer has a single self-sharpening hardened steel blade to neatly trim the fore-edge of the book. All trimmings are transported outside the machine to an external waste box allowing continuous operation.

BookMaster Pro and TrimMaster Pro

A fully automatic version of the BookMaster, the BookMaster Pro has simple push button operation to adjust the sidelays, endjog and staple/fold position. When used on-line with a Vario or DigiVAC+ collator, the collator's colour touch-screen runs the entire system. For other instances, a separate control panel is provided. The settings for standard sheet sizes are ready programmed and other custom sizes can be saved to memory for later use.

Automatic Stitch-Fold & Trim

ACCURATE CONTROL

You have absolute control of the set at every stage of the process, ensuring consistent results even with difficult papers.

SIDE-FED STITCH HEADS

Side-fed stitch heads are fitted as standard, for proven reliability and low maintenance.

SMALL FOOTPRINT

The small footprint saves valuable space and, with Vario collators, the stitch-fold unit fits beneath the collator.

INTEGRAL CONTROL

Job settings and memories are applied across the entire system for greater ease of use and fast set-up

BookMaster and TrimMaster

BookMaster

HIGH QUALITY STAPLES

The low impact stapling mechanism with moving clinches produces flat, well formed staples over the full range from 2 to 22 sheets.

MAINTENANCE FREE STAPLE SYSTEM

Changing the staple cartridge automatically replaces the main wearing parts.

OFFLINE USE

The optional motorised infeed makes hand-feeding easy.

ADDED VALUE

Add value to finished booklets by applying a SquareBack finish with the Watkiss SpineMaster™ - either on or offline.

Automatic Stitch-Fold and Trim

THE CHOICES

AUTOMATIC STITCH-FOLD & TRIM
Vario or DigiVAC+ versions, Hohner stitching heads, Fore-edge trimmer unit, High volume outfeed conveyor, Automatic online SpineMaster

BOOKMASTER & TRIMMASTER
Vario or DigiVAC versions, Manual or automatic adjustment, Offline control panel, 3rd stapler head, High capacity outfeed conveyor, Motorized infeed, Hand feed guide, TrimMaster/TrimMaster Pro trimmer, Automatic online SpineMaster
